

GOVERNMENT REGULATIONS ON WHEAT POLICY

BY F. W. QERSHAW

Regulations

1—"Coarse grains" means barley, oats, rye, corn, peas, flax and millet.

"Farm" means the total land being farmed by any one farmer.

"Farmer" means an owner, operator, or tenant operator of a farm.

"Grass" means all grasses, clovers and alfalfa.

"Landlord" means an owner of a farm operated by another person; and includes a mortgagee or unpaid vendor by contract or by law has a right to or a lien on or ownership in a part of the crop grown on a farm.

"Minister" means the Minister of Agriculture.

"Summer-fallow" means the cultivation of fallow-land before August 1st, 1941, in such a way as to conserve soil moisture and prevent soil drifting.

2—With respect to the number of acres in any farm by which the wheat acreage on such farm in 1941 is less than that of 1940, hereinafter called "Wheat acreage reduction", the Minister may, after requisite proof has been established, pay on or after July 1st, 1941,

(a) the sum of \$4.00 for each acre in summer-fallow over and above the number of acres in summer-fallow in 1940;

(b) the sum of \$2.00 for each acre sown to coarse grains or grass in 1941 over and above the acreage sown to coarse grains or grass, respectively, in 1940, provided that no claim in respect to the same land may be made for summer-fallow in 1941 under paragraph (a) hereof;

(c) the additional sum of \$2.00 per acre on the number of such acres which, having been sown to grain in 1941, or to rye in the autumn of 1941, are in grass or rye on July 1st, 1942, notwithstanding that such land may have been summer-fallowed or sown to coarse grains in 1941;

(d) provided that in the case of any farm on which

(a) there was no wheat acreage in 1940 but which had wheat acreage in 1939, the wheat acreage of 1939 or 60 per centum of the cultivated acreage in 1940, whichever is the less, may be accepted by the Minister as the basis for wheat acreage reduction in 1941;

(b) there was wheat in 1940 on more than sixty per centum of the cultivated acreage and in 1939 on less than forty per centum of the cultivated acreage, or vice versa, the acreage of the wheat acreage for 1939

and 1940 may be accepted by the Minister.

3—A farmer to be eligible for any payment with respect to wheat acreage reduction shall make application not later than May 31st, 1941, or to the secretary of the Municipality in which he resides or, in the case of unorganized areas, to the Provincial Government, on a form to be distributed by the Municipal Secretary or the Provincial Government as the case may be; and on fulfillment of one or more of the provisions of Regulation 2, shall submit a sworn statement or statement of claim for payment.

4—A landlord to be eligible for any payment with respect to wheat acreage reduction shall make application on or later than May 31st, 1941, to the secretary of the Municipality in which the land in which he has an interest is located on, to the Provincial Government, on a form as referred to in Regulation 3.

5—Notwithstanding the provision of any provincial law,

(a) in the case of a farm in which a landlord has an interest in the crop returns from the whole of the farm, the landlord may be entitled to receive not more than one-third of the amount to be paid for wheat acreage reduction on the farm;

(b) in the case of a farm in which a landlord has an interest in the crop returns from a part of the farm only, the landlord may be entitled to receive not more than one-third of the amount to be paid for wheat acreage reduction on the proportion of the farm in which he holds an interest;

provided that the landlord may receive less than the said one-third of the amount to be paid for wheat acreage reduction by mutual agreement between the landlord and the farmer, or upon submission of proof that, under the terms of the contract with the farmer, the landlord is entitled to less than one-third of the crop returns.

6—No payment shall be made under these regulations with respect to any farm which was operated by a tenant in 1940 and is operated by hired labour in 1941.

7—No payment shall be made with respect to reduction in wheat acreage on the following lands:

(a) Farm lands declared as Experimental Farms.

(b) Farm lands declared submarginal under the provisions of a provincial statute and not occupied in 1940.

(c) Farm lands operated by Provincial Government, government institutions, or universities.

8—The Minister may withhold pay-

BELLY RIVER HIGHWAY - WATERLOO LAKES NATIONAL PARK ALBERTA

WEDDING

BEATTIE - WERLING

A quiet and pretty wedding was solemnized in the Parsonage of the St. Paul's United Church in Calgary, Saturday, April 6th, when Eileen Alberta, only daughter of Mr and Mrs Edward F. Werling, became the bride of L. A. C. Keith Beattie, only son of Mr and Mrs G. L. Beattie of Sherbrooke, Quebec. Rev. Wesley Bainbridge officiated at the ceremony.

The bride was charming in her floor length dress in sky blue net over satin with embroidered insertions in the skirt. A small jacket of embroidered net completed the dress. Her three quarter length veil of blue was caught in place with forget-me-nots and she carried a bouquet of pink carnations and maiden-hair fern. Mr and Mrs L. A. Stone were the attendants.

The reception was held at the home of the bride's grandmother Mrs. M. Carlsen, and only close relatives were present. The reception table was centered with a three tier wedding cake flanked on either side by white tapers. For going away the bride chose a tailored suit of navy blue and white sheer blouse and navy blue accessories. The happy couple will reside in Calgary until later in the month when they will leave for their new home in Sherbrooke, Quebec.

NAMAKA

Namaka Farm School came over Friday afternoon to play the first baseball game of the season. The score was 18 to 5 in favour of the visiting team. A return game is to be played in the near future.

Miss Louise Coates was visiting relatives in the district last week and called on friends in Namaka on Saturday afternoon. Old timers will remember the Coates family.

Cornie Williams left Toronto Monday morning for Halifax, and expects to be going overseas very soon.

Orville Bremner spent Monday in town going back to Calgary on the evening train.

There will be no United Church services in Namaka Sunday, we are joining with Strathmore for the Easter service—time 11 a.m.

An aircraft flying at a height of 4,000 feet was beyond the reach of gun batteries in 1918. The average height at which enemy planes have been shot down recently over England is 16,000 feet—more than three miles.

In Appreciation

"The Standard is deeply grateful for the very beautiful commentary on Leonardo da Vinci's picture 'The Last Supper' written for us by Rev. Leslie T. H. Pearson."

The picture is a very beautiful one, and the commentary is admirably in tune with the art.

Mr. Walter Basant bought a high priced Hereford bull at the Calgary Stock Sale last week.

RED CROSS DISPLAY

The display of clothing in the Western Dept. Store Window includes, costumes for soldiers, clothing for convalescents and refugees, hospital supplies. These are samples of garments that are being shipped by the local Red Cross. Further helpers are urgently needed.

EDITOR OF THE MACLEOD GAZETTE ORDERED TO BED FOR REST

H. T. Halliwell, editor of The Macleod Gazette and The Coleman Journal was ordered to bed by his doctor while paying his usual week-end visit with his family in Coleman. Mr Halliwell is suffering from a heart condition and though ordered to rest for some time, expects to be up and around again in the near future.

CHEADLE

The fourth in a series of community parties was held in the Cheadle Hall on Tuesday evening. These parties are being held with an idea of fostering a Community Club—some time in the future. "Red" McQuinn and Lewis Billway were the hosts. Cards were played and the feature of the evening was the measuring of the Ladies waist to find the smallest and the largest.

The Ladies Club will hold their regular meeting on April 16th.

Mr and Mrs Geo. Jackson and Miss Margaret Jackson are back from Victoria. We are glad to report that Mr Jackson's health is much improved.

Spring, Spring, beautiful Spring. The farmers whistle, the birds sing. The farmer wends his busy way. The thoughts in his mind I dare not say. But it's lucky the roadgrader passed today.

HERVEY

Mr Chris Hagen from Redlands and Nels Woodhouse were visitors at the Raseau home this week.

Mr Edgar Agur of Thron, Alta. was a guest at the Laycraft home 3 days last week.

Mr Shacker will leave Thursday to meet his wife who is teaching at Florin, Alta., and will spend the holidays together.

Mr Walter Basant bought a high priced Hereford bull at the Calgary Stock Sale last week.

COMING EVENTS

Saturday, April 12th. The Ladies of Sacred Heart Church are holding their Annual Easter Tea and Sale of Home Cooking in the Sample Room of the King Edward Hotel, Saturday, April 12th. Everybody welcome.

In future the Red Cross Sewing Group will meet Tuesdays and Saturdays in the Sample Room. The change from Wednesday has been made for the convenience of country people, who can do some necessary shopping when in town Tuesdays.

Edna Jagers will be at the United Church April 20, when she will give a Poem Recital of her own poetry. Admission, adults 30c, students 15c.

DANCE AT CHEADLE—April 18th. Sponsored by the Cheadle Ladies Club. Music by "The Serenaders." All are invited.

BELIEVES FREE TRADE WOULD SOLVE WHEAT PROBLEM

(H. G. L. Strange)

"People all across Canada have been making suggestions as to what should be done about the future of the Canadian wheat industry. Some think that a considerable part of our Prairie wheat acreage must be turned to livestock production. Others think that industrial use offers an outlet for large quantities of wheat. Still others consider that wheat can be processed economically into alcohol.

Another large group believes that we must reduce acreage so that only sufficient wheat is produced to meet the limited demand as it existed just before this war.

I do not believe myself that these things offer any real hope. I feel they would only result in reduced incomes and so in sadness and depression to

(Continued on Page 812)

"THE LAST SUPPER" BY LEONARDO DA VINCI

"Art is no age has flourished apart from religion," the late Dr. Percy Dearmer, Canon of Westminster, argues, "and by far the greatest art in the world has been Christian art. Leonardo da Vinci's masterpiece, 'The Last Supper,' certainly adds weight to this argument. This picture is probably the most widely known in the world, for whenever the Bible has been read, Leonardo's 'Last Supper' has followed.

The original is a fresco on the walls of the refectory in the Monastery of Santa Maria delle Grazie in Milan, and is, today unfortunately little more than a ruin. Many factors have contributed to its present faded and despoiled condition. The master executed his work in oils on plaster, in a damp situation and the moisture soaking through, soon resulted in damage that was irreparable. Even before the artist's death it showed unmistakable signs of perishing. Vandalism did the rest. In 1652 a doorway was cut in the wall, mutilating the feet of Christ and two of the Apostles. Then in the 18th century, daubers attempting restoration, wrought further injury. French soldiers occupying the monastery in 1798 made a stable of the refectory and again the picture suffered. Only in recent years have precautions been taken to prevent what remains. But though everything possible has been done to save it, it is feared that it will scale and crumble into dust.

Yet in spite of all, the power of the great master's preception is still present and remains the best monument of his genius. The composition of the

picture cannot be surpassed, and no artist ever painted faces so wrought upon by depth of feeling as did Leonardo in this masterpiece. He chose for his subject matter the very moment at which Our Lord declares that there is a traitor in the company. We are shown the effect of a speech on twelve persons—on twelve different temperaments. With the instinct of genius Leonardo, divided the actors into groups, two groups on either side of Christ and cleverly linked these groups so as to imitate the emotional reaction of an unbroken continuity, animated by a single movement. The whole is like the successive undulations of a vast wave of emotions. As the apostles, indignation, indignation, despair, honor, anger, fear are all depicted. The fatal words of Jesus produce the tumult and so imbued with life and emotion are the faces of the Apostles that we seem to hear their confused voices asking "Is it I?" We look into the very depths of their hearts which are shaken by the most incomprehensible and fearful thing that has ever come to pass in the Universe—the birth of the evil from which God must die.

Especially are we struck by the group composed of Judas, John and Peter. Immediately to the right of our Lord, Judas is shown clutching his dagger, clutching with convulsive fingers the bag with the pieces of silver. As he waits to catch the answer to Peter's question to his sudden movement overturns the salt cellar—and the salt is split. Peter, in a fit of wrath has risen impetuously from his hind him, his right hand seeling a

ment of any farmer who submits a false report of his acreage or a false claim for payment.

The Minister may, with the approval of the Governor in Council, appoint such administrative and technical officers and employees as he may deem necessary for the purposes of these regulations and at such rates of pay as may be likewise approved.

He will lay down my life for thy sake. Nearest of all to Christ is John, his hair soft as silk, smooth at the roots, curling towards the tips; his lowered eyelids heavy with the languor of sleep; his submissively folded hands—all breath of heavenly calm and serenity. He alone of all the disciples is not disturbed or afraid or doubtful. In him, is fulfilled the word of the Master: "That they all may be one."

as thou, Father, art in me, and I in thee. But it is to the face of Christ, the centre that our eyes return again and again. Here all the unfathomable mystery of the ages is depicted. The words of St. John's Gospel are ringing in our ears. "In the beginning was the word, and the word was with God, and the Word was God. The same was in the beginning with God."

All things were made by him, and without him was not made anything that was made. And the Word was made flesh, and we were born of his glory.... In the face and movements of the apostles, the greatest of men, all the earthly emotions of the great Masterpiece have been made by famous artists the world over, and so, though the original may perish, Leonardo's conception remains. His is the calmness of the Last Supper will never be lost.

Research Develops New Uses For Farm Products

Scientists appeared at the meeting wearing test tube clothing — suits, and hats produced from milk, socks from coal, shirts from wool and ties from soy beans. The synthetic products appeared the same as the genuine articles.

The Chemurgic movement aims to add additional dollars to the farmer's income through creating new markets and new uses for products of the land, said Mr. Lamont. The Chicago conference was informed that scores of new industrial uses had been developed for corn, soy beans and other farm products in the past year. Wool produced from milk was replacing rabbit and beaver half used in the manufacture of men's for felt hats. High quality clothing, wines and paints were also being manufactured from surplus milk production and still it was estimated more than fifty billion pounds of milk were without a market.

Rubber manufacturers have prepared plans for the creation of three additional stand-by plants for the manufacture of synthetic rubber in case war in the near East should shut off essential supplies of this commodity. A synthetic rubber plant is already in operation. It is estimated that these plants would be capable of supplying America's essential supply of rubber. The synthetic rubber would be manufactured entirely from products of American farms, forests and mines. Rubber manufacturers are already one of the greatest industrial users of farm products. Corn, cotton, potatoes, milk, sugar, pine-wood and bees-wax are all now used in the production of automobile tires.

In the development of its gigantic defence plans, the United States is turning to the farm for materials to conserve essential metal supplies. Plastic materials made from soy beans and other farm products are being developed to replace metal goods. A plastic material has been developed which when used in aircraft makes the plane invisible at 3,000 feet.

BUILDING BOOTS FOR THE FORCES

Better than flag or sun or bright uniforms as a symbol for the Canadian fighting man would be a pair of hob-nailed boots, says a writer in the current issue of C.I.O. Deal. For even in this day of mechanized warfare there are long route marches, constant hours of steady walking on spongy dirt.

In factories throughout Canada these days much of the complicated machinery that has been employed in mass manufacturing and many of the skilled men and women workers who have been creating fine Oxford, sports shoes and even boots for the succeeding generations of Canadians, are now busy turning out soldiers' boots by the hundred thousand. They are making them for the men of Canada's army, at home and overseas, for the men of the Air Force and the Navy and for the hundreds of thousands of trainees who are leaving offices and factories for army camp. And they are making a different kind of boot than has ever been made in Canada before.

All boots that equip Canada's fighting forces in this war are black; in the last war they were tan. Each army boot weighs approximately 2 1/2 pounds, hob nails and all, while the average civilian Oxford is about one pound. Men in the army get hob-nailed boots with horseshoe-shaped metal leathern heels and extremely thick soles. Men in the Air Force have no hob nails, rubber heels and lighter soles.

In addition to supplying sodium bichromate, the chemical industry contributes sodium sulphate for the de-hairing of skins and adds and finishes to ensure a constant, true tone of black, according to the article. But the job of chemistry is giving foot comfort to the men in uniform is concluded before the leather enters the boot and shoe factory. From then on it is up to the men and women who cut, shape and make the boots that carry Canada's men to war!

CHRISTIAN SCIENCE •••
"Unreality" is the subject of the Lesson-Sermon at all Christian Science Churches on Sunday. The Golden Text is 1 Timothy 4:17. One of the Scriptural citations is: "For he satisfieth the longing soul, and filleth the hungry soul with goodness" (Psalm 107:9). One of the correlative passages from "Science and Health" with Key to the Scriptures" by Mary Baker Eddy, is "Let the slave of wrong desire learn that lesson of Christian Science, and he will get the better of that desire, and ascend a degree in the scale of health, happiness, and existence" (p. 407).

LEO MELISSEN WRITES FROM ENGLAND

TO HIS PARENTS IN
STRATHMORE

England, March 7, 1941

Dearest Dad, Mother and the rest at home—

I received your most welcome letter the other day. I am very glad to hear that you are all well.

I've made my trip to Glasgow so I will now commence to tell you about it. Before I start I will tell you that I have ditched the whole way from London.

We took the train to London in the evening of November 14th and from there we took the underground to High Barnet which brings you on the outskirts of London and on the Great North Road. We then got speaking with some truck drivers and they told us where we could make the best connections with the trucks to bring us to our destination. They told us that they had a club, known as the Bedford Drivers Club, and that they had stuck bars all the way along the Great North Road.

We then got on our way, and about two miles out of High Barnet was our first stop at the Beacon Cafe. We went in and had no time to get our ride with one of the trucks. He happened to be going to Leeds so that brought us a good way closer. On the way we made several stops in small towns and saw many interesting things. The weather happened to be wonderfully nice and sunshine which added to the beauty of the trip. Finally about 2 o'clock in the afternoon we got into Leeds. As we were quite anxious to get to Glasgow we didn't stop any longer than we had to. Therefore as this driver knew a lot of the drivers from different parts of the country he soon got us a ride to Carlisle. When we left there we went through Sheffield and stopped there for a few hours to get repairs. There certainly were many things that were very interesting to hear about and see. After we got on the way again we came past parts of the Great Wall which had been built to keep out the Scots. Finally we arrived in Carlisle and as it was well on into the night we stayed there. The next morning we got in contact with a driver of Iainston Transport which goes from London to Glasgow. The next day we were on the way to Glasgow. And believe me, it wasn't the worst, it was very interesting and picturesque. The valleys and hills, the lovely old fashioned houses with thatched roofs added to the interest of the trip. After many tales had been exchanged the next day I knew we were near the outskirts of Glasgow. It was about 5 o'clock so we went to the Lions Club and booked a room. Then we inquired about what to do and where to go for the best amusement. As we were mostly interested in going skating we asked about that first. They told us that the rinks had been taken over by military authorities and the closest one was at Paisley, across the Clyde about eight miles.

After supper we had a shave and a shoe shine and we struck out for the Paisley rink. To our surprise we were fortunate to get a pair of hockey skates. The arena is much similar to the one in Calgary. The records were the same old tunes as Dad always plays. As I sat down to rest now and again I could picture Dad at the rink playing probably the same tunes and darn it ear let it get the best of me, oh, yes! Dad the only record they didn't play was "In the Good Old Summer Time."

We of course met some nice Scottish girls and the one I had invited me to come and stay at her home. Well, I will admit it didn't take a lot of persuading but I didn't want to impose on her people. Anyway I went home with her. I spent the rest of my leave there and certainly had a wonderful time. We went skating every night, a few shows in the afternoon. One afternoon we and a few more of her friends went cycling. We went out to some hill where the law of gravity is different. I forgot the name of the hill but I'll let you know next letter. Anyway on going up the hill you can very nearly coast, but on coming down you have to use every effort in order to make it. It's hard to believe but it's true. I found out for myself, otherwise I would never believe it. The week seemed to go very fast and before I realized it my leave was up. The last evening there were some of her friends in and we played cards, had a sing-song and danced until about one o'clock. It was all done for my benefit and she asked me to be sure and come to them on my next leave.

or Stardom?

This is Miss Alexis Smith, 18-year-old beauty who is being groomed for stardom by Warner Bros. Her career and stardom in the United States, the lovely lady was ruled to the studio for a last after an agent saw her in a Los Angeles college play. She is destined to a seven-year contract.

Rubber Is Now Produced From Farm Wastes

Test Plant to Produce Motor Fuels
From Wheat

Automobile tires with a life of 50,000 miles and synthetic rubber made from corn stocks, straw and waste farm fibres are the newest discoveries of research chemists, said Cecil Lamont, of the North-West Line Elevators Association, who attended the annual conference of the United States Farm Chemurgic Council just held at Chicago. Leading scientists, industrialists and heads of farm organizations and cooperatives of the United States gathered at the Chicago conference to discuss latest developments in finding new markets and industrial uses for farm products.

The North-West Line Elevators As-

That concludes my story of my leave and it was certainly a happy and enjoyable one. And I say that the Scotch people are very hospitable.

Love, from Leo.

position is urging the Federal Government to establish a Western division of the National Research Council dedicated to research in expanding markets and finding industrial uses for Canada's surplus wheat. At Chicago, the chief of the four regional research laboratories, established at a under way. At the Prairie laboratory cost of \$7,800,000 by the United States Government, announced that three of and will be used to ascertain most the four laboratories had been economical means of manufacturing brought into operation by January, 1941, and the fourth will be opened other cereal crops, it was reported.

Sister Susie's Spinning Suits for Soldiers!

Most women carry on their war production at the Red Cross rooms or at home with knitting needles. Susie carries on her part of the war at Dominion Textile, 30 percent of whose employees are women. They make uniform cloth, yarns for web equipment, camouflage netting, anti-gas cloth, aircraft cloth, etc.

Incidentally, Susie and the thousands of other women in this company receive higher wages than the average for women in the other leading Canadian industries.

"The problem of our day is to transfer the terrific dynamic of a competitive world into a passion for social justice." — Dr. E. A. Corbett.

GOOD FRIDAY—EASTER MORNING

THIS week the Christian World is commemorating one of the most significant events in the Christian era. The life of our Saviour brought to so apparently an ignominious end, which crushed the hope and faith of His followers to a feeling of despair pervaded the group following the events of Good Friday.

So it would seem in large measure the world is passing through a bitter lull in the day.

But Easter Morn came and with it the knowledge of a Risen Christ revived the hope and faith of the former disciples.

The words of The Messiah, "And I, if I be lifted up will draw all men unto me," will yet be fulfilled — out of this conflict of war and injustice a better world will arise and mankind will eventually practice the Teachings of Christ the world over.

"COME OVER AND HELP US"

In the War Map of this (Tuesday) morning's *Albertan* we see the words Macedonian Battleground in large black letters. Our thoughts revert to the cry that went out to Paul in earlier years from the Apostles in Macedonia to "come over and help us". So today is that cry going forth and it is being responded to by the British and American peoples in whole hearted measure.

CANADA'S WAR COST

IN ITS NATIONAL war effort in the coming year, Canada will devote more strongly in the traces of destiny than the whole of the last war period.

"Never in the history of war have 11 million people given so freely and pledged so fully their treasure, their resources and their manhood."

By the yardstick of cost, Canada will stretch her war sinews more over

Under The Street Lamp

by P. E. (Pat) O'Holroy

Mr. Nicholl: "Fred! Chase down and get me a package of Spuds. And make it celeriously. See that you're back in five minutes!"
Mr. Holmes: "Yes, sir, I'll get them and be back in five minutes if it takes me all day."

Doris: "After the dance he took me right straight home."
Betty Wilson: "How vulgarly original!"

A scientist has just discovered that plants grow better if the day is prolonged with artificial light. Romaine Backhouse says that further investigation proves that the plant which profits most from this treatment is the electric light plant.

Sue: "Is skating hard on the feet?"
Vaughn: "Ree—on the feet."

Pop Hiltie: "Fred, you fool, you're off the key."
Fred Hiltie: "There, there, Pop, don't try off the Handel!"

Art Hay (on a spree): "Say, I lost my balance."
Ernie (ditz): "Wowwell, let's go b-b-back and look for it!"

Irene Wilson: "Would you like to take a nice long walk?"
"Way, I'd love to," exclaimed Russ Morgan, joyously.
Irene: "Well, don't let me detain you."

A. W. Woman Pilot Applies For Position With T. C. A.

Winipeg—Trans-Canada Airlines has received its first application from a U. S. woman pilot. The lady is a resident of upper New York State, a nurse by profession, holder of a private pilot's license and the mother of two children. As T. C. A. employs only male British subjects and, furthermore, puts its prospective pilots in overall for six months of ground duty prior to actual flight training, the application was declined with thanks.

Major-General E. W. Sansom, officer commanding the Third Division, has been named to command Canada's new armored division it has been announced in Ottawa. Brigadier F. F. Worthington, officer commanding the First Canadian Armored Brigade, was named to command the First Canadian Tank Brigade.

DR GERSHAW WRITES FROM OTTAWA

For the last month the Government has been bombarded by members from British Columbia, the Prairie and the Maritimes for more aid to industries in their particular districts. In the whole province of Saskatchewan there is only one Government industry as that is the making of a few guns at Saskatoon. The British Columbia members report that there is a lot of unemployment at the mines and stress the need of mine contracts for War material there. The Government is guided by the advice of the technical officers but for Canadian orders the policy of spreading out the work has been started in a limited way lately. Nova Scotia was one a great place for Wooden Ship building but there should be put to work. The Minister of Defense, for the Navy, explained that 10,000 ton Cargo ships were not equipped for the building of such ships. The builders had been asked to tender but the lowest bid was \$25,000 more than the bids from other places so mine contracts had been let in his native province. It takes longer to train sailors than to build ships.

The Minister of Finance writes the Budget but its contents are kept secret from every one else until the last minute. Several years ago an increase in the tax on Sugar was announced to take place at 3 p.m. on that day. It was then after 3 in Ottawa but was only 12 o'clock in Vancouver and some dealers made a killing by buying sugar before 2 p.m. there. This year it was rumored that there might be an increase in the tax. It was only a surmise but the Minister must have heard of it because on Sunday night he announced an advance of 1c per lb on the whole sale price. This extra price was all

at Lethbridge. From the yields obtained in field plots at the Station, and also from plots at other places in size, it would appear that on irrigated land soybean crops in the Lethbridge district should be expected to yield 20 bushels or more under average conditions. Tests with soybeans on dry land have been too limited to warrant giving any statement as to what yields should be expected.

At Lethbridge.

From the yields obtained in field plots at the Station, and also from plots at other places in size, it would appear that on irrigated land soybean crops in the Lethbridge district should be expected to yield 20 bushels or more under average conditions.

Tests with soybeans on dry land have been too limited to warrant giving any statement as to what yields should be expected.

SOYBEANS

LETHBRIDGE EXPERIMENTAL STATION

Soybeans have been under test at the Lethbridge Experimental Station for many years. In the early years they were looked upon as a crop which showed little or no promise for Alberta on account of the coolness of the season, and the early fall frosts, but tests were continued in the hope that with improved varieties and improved methods of growing them it might eventually be found that they could fill an important place as a specialized crop for irrigated land. The last five seasons have been more favourable for soybeans than those previous to that time, as the frost-free period has extended later into the fall. During that period also new varieties have been developed which are quite superior to those used formerly. The results obtained with soybeans at the Lethbridge Station on irrigated land in recent years have, therefore, been much more encouraging, and indicate that there is justification for increasing the acreage of soybeans at present, provided the seed can be marketed at a satisfactory price. This expansion of acreage, however, should take place only in the southern and southeastern parts of the province, where the weather is hottest and the frost-free period is longest.

The growing of soybeans fits in very well with the growing of sugar beets as the sugar beet drill and cultivator can be used for the seeding and cultivating of them. They can be seeded immediately after the seeding of sugar beets is completed and harvested before the harvesting of sugar beets commences. Either the blower or the combine can be used for harvesting. Wisconsin Early Black and Manitoba Brown are the two earliest varieties which have been tested at the Station. Unfortunately, they have two bad disadvantages in that they shatter badly if they are allowed to stand any length of time after ripening, and on account of being dark in colour they make a dark coloured oil, which is undesirable. Kabati, a new variety, on the other hand, shatters very little and is satisfactory from the standpoint of colour. It is practically as early as the two above-mentioned varieties. Varieties such as Mandarin, O.A.C. 211, etc., which are grown extensively in Eastern Canada have been found decidedly too late

The average annual incomes of the Western farmers over the last 15 years was \$225,000,000. Since the downfall of the low countries and France the markets have, to a large extent, gone.

The Government proposes to guarantee 70c for Wheat at Fort William and to pay about 35 million dollars for summer fallow and coarse grain bonuses. This will bring the income up to the average.

The Wheat policy is only for one year.

Bells of Freedom...

Ring every Sunday, in Canada

"In many lands this year bells are silent—others are dimmed . . ."

By Hon. W. L. MACKENZIE KING.

It is your privilege to attend the church of your choice . . . to worship as your conscience wills.

A Nazi world means the end of the church you love. It means compulsion to accept a form of worship prescribed by political dictators.

In the words of the Prime Minister, "When we speak of the preservation of democracy, of Christian values, of civilization, we use no idle words . . . the existence of all three is at stake."

Freedom of worship is one of the priceless privileges that all Canadians enjoy.

That dearly-bought right is in jeopardy. Therefore we must all unite in supporting Canada's war effort in order to preserve this Freedom.

Keep up YOUR PLEDGE! . . .

Increase Your Regular Investments in WAR SAVINGS CERTIFICATES

Remember—in addition to your pledged investment—you can buy extra War Savings Certificates from your bank, or direct from the War Savings Commission, Ottawa.

Have You Been Overlooked? LET'S MAKE IT A WHIRLWIND FINISH!

("The Boys Rely on the Folks Back Home")

Thousands of firms and individuals, in all parts of Canada, have responded magnificently to this Six-in-One Appeal. But there are other thousands equally ready to help. You may be one who has still to be heard from.

This is an appeal to every Canadian who has been overlooked. We wish for every Canadian, at home, an opportunity to support our men in uniform. The Fund is now well on the way to its objective. That objective definitely can be reached, probably exceeded.

For the sake of "The Boys," let's finish it with a bang that will raise resounding cheers from Coast to Coast!

How You Can Help

If you have not yet been called on by a War Services worker, and if you have not yet sent in your subscription, make up your mind NOW what you are going to do, and do it TO-DAY! Fill in the coupon below and mail it to your Provincial Headquarters at the address

shown. If you know of some friends who have also been overlooked, get them to do the same.

The form is self-explanatory. Simply check on the left in the appropriate place, and if you enclose a remittance, make it payable to Canadian War Services Fund. An official receipt will be sent you by return mail.

Every Dollar Does Its Job
Remember—all monies contributed to the Canadian War Services Fund will be divided in accordance with government-approved budgets, amongst the six organizations embraced in this campaign.

A non-profit corporation with letters patent from the Dominion Government is your guarantee that every dollar that you subscribe will be properly applied to provide comfort, cheer, recreation and needed personal services to our fighting forces—services not provided in any other way.

Your contribution is urgently needed!

THE WEEK IN EDMONTON

● School Vans—

New regulations governing operation of School buses have been approved by the Highway Traffic Board. It was announced last week. Henceforth, all school vans must come to a complete stop at railway crossings, and the maximum operating speed must not exceed 25 miles an hour, while carrying school children. No motor vehicle may be operated as a public service or commercial vehicle unless the owner or the local school board has obtained a certificate from the highway traffic board. The crossing regulation states that "every driver... shall bring the vehicle to a full stop at a distance of not less than 15 feet and not more than 50 feet from the nearest rail." He must be sure of safety before proceeding.

● The Roads—

Following a session of the Legislature's agricultural committee, a motion of endorsement upheld the recent statements issued in the House that during the past ten years more has been spent on roads, maintenance, construction and management than was received from gasoline and motor taxes. The statements, made by Hon. A. Fallow, were certified by the audit department. Later they were challenged by the Calgary branch of the A. M. A. and counsel for that body appeared before the committee. After a two-hour discussion, the charges were rejected and the minister's statement upheld.

● Tourist Convention—

Opening of Alberta's first tourist trade convention in Edmonton, April 11, promises to be successful from every point of view. It was believed in official quarters. It is expected that representatives of the Alberta Motor Association, Hotelmen's Association, Boards of Trade, Chambers of Commerce, Calgary Stampede and Edmonton Exhibition, oil companies, transportation companies, railways and the press will be in attendance. It is also expected that D. Leo Dolan, chief of the Canadian Travel Bureau as well as National Parks officials, may also attend. Main aims of the conference are to focus provincial publicity effort, to avoid overlapping foster local development and formulate policies of ethics and operation for improvement of the tourist industry. The conference has been called by Hon. E. C. Manning, Minister of Trade and Industry.

● Climaxing complete change in the administration of The Game Act in Alberta, E. S. Heusties has been appointed Game Commissioner. It is announced by Hon. N. E. Tanner, minister of lands and mines. Under the new administration, forest rangers will also act as game guardians, and the forestry division's radio, intelligence service will also be used in the interest of game management. Conservationists have long urged this step.

● Two new Canadian Army Huts are being built in Edmonton by the organizations participating in the current national drive for funds. First will be at No. 16 Elementary Flying School and the second at No. 2 Air Observer School. Frank W. Coffey, science teacher at St. Joseph's high school has been named supervisor of the first. For 10 years active in youth and social welfare work, Mr. Coffey

was formerly recreational supervisor for 2,000 single employees of a Hawaii sugar plantation. These huts will fill a long felt need, since armies have had no such facilities here.

● DEPARTMENT OF AGRICULTURE NOTES—

● Seed Poultry House—
Properly constructed and poultry houses have proven satisfactory in many parts of Alberta. They are economical to build and if properly ventilated are dry and warm in winter and cool in summer. Materials required are poles, soda and straw for the main building, some 2 x 12 planks for window and door frames and some glass sash.

● Seed Treatment Important—
The treatment of seed grain for smut is advisable in all cases. The cost of such treatment is small and in no other way can the farmer be assured of preventing losses from this disease.

KNITTED ARTICLES SENT TO RED CROSS FEB. AND MARCH

Highway No. 2 To Be Highway No. 1 In Future

In future the Highway from Banff east to the Saskatchewan border will be changed from No. 2 to No. 1 coinciding with Main East and West Highways in Saskatchewan and Manitoba.

CANADIAN LEGION

Those who contributed to the turkeys sent overseas around last Christmas will be pleased to know that the following card has been received by the Legion from "Somewhere in England": "We enjoyed your Alberta Turkeys today. Thanks for the memories of Home." "Picked out your card in the Host. Thanks from the troops. Regards to all the gang in Strathmore, Billy Gray, etc."

Wm. McLaws ex Houstonian, Staff Captain A.S. Services.
Bert Griffith in a letter recently received states: "We shall soon have spring with us, snowdrops are out all primroses are to be seen in the lanes, even the birds are waking up, and here and there in the gardens you can see the men leaning on their spades. Now and then you can see them give the spade a movement, but so far I haven't really seen them do any hard work. With the overhanging bowler hat on his head, the old clay pipe going full blast, I don't believe you can shake these people over here. They may blow their home to bits, but they will still carry on as if nothing has ever happened."

ARDENODE

Mr and Mrs Cliff Dawson returned home a few days ago, after spending several months in Kenilworth, Man. Mrs Chas Joel returned home last week bringing Helen home from the hospital where she has been taking treatment for the past few weeks.

Mr and Mrs A. Watson and family spent Saturday in Calgary.

Mr Fred Hambridge was the lucky winner of the Victory wheel last week. Mrs D. S. Brook and family were Calgary visitors Friday last.

Mr H. Sharman and Wilfred and Mr F. Antice spent Sunday visiting friends in Swallow.

Mr and Mrs J. Davis were guests of Mr P. E. Sarsons and family Sunday.

"My Earthly Mission Is Fulfilled"

The following impressive letter, ever losing faith in the future. My death would not mean that your struggle has been in vain. Far from it. It means that your sacrifice is as great as mine. Those who serve England must expect nothing from her; we debate ourselves if we regard our country as merely a place in which to eat and sleep.

History rewords with illustrious names who have given all, yet their sacrifice has resulted in the British Empire, where there is a measure of peace, justice, and freedom for all, and where a higher standard of civilization has evolved, and is still evolving, than anywhere else. But this is not only concerning our own land. To-day we are faced with the greatest organized challenge to Christianity and civilization that the world has ever seen, and I count myself lucky and honoured to be the right age and fully trained to throw my full weight into the scale. For this I have to thank you. Yet there is more work for you to do. The home front will still have to stand united for years after the war is won. For I think that can be said against it, I still maintain that this war is a very good thing; every individual is having the chance to give and dare all for his principle like the martyrs of old. However long time may be, one thing can never be altered—I shall have lived and died an Englishman. Nothing else matters one jot, nor can anything ever change it.

You must not grieve for me, for you really believe in religion and all that it entails that would be hypocritical. I have no fear of death; only a queer elation. I would have no other way. The universe is so vast and so ageless that the life of one man can only be justified by the measure of his sacrifice. We are sent to this world to acquire a personality and a character to take with us that can never be taken from us. Those who just eat and sleep, prosper and prosper, are no better than animals if all their lives they are at peace.

I firmly and absolutely believe that evil things are sent into the world to try us; they are sent deliberately by our Creator to test our mettle because He knows what is good for us. The Bible is full of cases where the easy way out has been discarded for moral principles.

I count myself fortunate in that I have seen the whole country and known men of every calling. But with the final test of war I consider my character fully developed. Thus at my early age my earthly mission is already fulfilled and I am prepared to die with just one regret, and one only—that I could not devote myself to making your declining years more happy by being with you; but you will live in peace and freedom and I shall have directly contributed to that, so here again my life will not have been in vain.

Your loving Son,

ELECTRICAL DAYLIGHT

Electrical and chemical engineers have brought forth man-made daylight which rivals nature's own. Work rooms, play rooms and reading rooms can be flooded with light, free from the vagaries of cloud and mist, writes Ted Sanderson in the March issue of C.E.J. Oval.

In these days of threatened air raids, with blackouts and night-alarm factories that work day and night, artificial light of high quality has become of paramount importance. Edison's first incandescent lamp of 60-odd years ago would be pitifully inadequate in modern methods. Many generations of light bulbs have come and gone since then. Each generation has shown new refinement and efficiency. Electrical and chemical engineers, and metallurgists have combined their knowledge and skill to create new marvels in lighting. Recently a lighting expert made an astounding statement—"We can now produce artificial daylight that is better than real daylight." He supported this paradoxical claim by explaining that while real daylight is constantly varying, artificial daylight can be made uniform.

This expert was referring especially to the new fluorescent lighting tubes which not only produce purer, softer and much cooler light in practically any desired color but give off from three to almost 200 times as much light, depending on the color, as an incandescent lamp will produce from the same electric power. Fluorescent lights are straight glass tubes containing argon gas and mercury vapor and having a small tungsten filament

LANDING FIELD

A little windsock with its pooded sides
Tugging against the currents of the air;
A runway facing up against the sun,
Color and life and movement every where.
Gay larks in blue who dare the vault
of sky above
Singing on their lips and laughter in their eyes.

There is a whirl of swift propeller blades,
A face above the cockpit flushed and gay;
A lifted hand, the slamming of a door,
A little rushing wind and here away,
Gaining his altitude with splendid ease,
Like a great bird circling above the trees.

Whence comes this breed of men, this splendid race,
Knights of the arching skies, these sons of ours?
At home amid the clouds, they ride aloft
Counting a life-span by their flying hours!
A shining speck above earth's weary trails,
Charting the skies on flashing silver sails.

—Edna Jaques

CANADIAN GARDEN SERVICE 1941

By Gordon Lindsay Smith

Nothing is to be gained from working soil before it is ready. In fact with heavy ground, according to garden authorities, too early digging is about the worst possible thing one can do. Not only is it a messy job, in the first place, but the sticky clay is quite likely to bake later into hard lumps, suitable perhaps for temporary building material, but not for growing flowers and vegetables.

As a matter of fact gardening is not classed as heavy work, and certainly lifting mud in the shovel curb the natural impulse to be out digging in early Spring and wait until the surface water has completely disappeared and one can walk and work in the garden without getting the shoes muddy. When the soil reaches this stage it is fit to work, and not before. Good garden soil in the right working condition crumbles and breaks into fine, tiny pieces; it does not pack into lumps.

Don't Plant Too Soon—

This warning against working soil too soon also applies to planting. Many more flowers and vegetables are lost through planting too soon than too late, and in war time especially we cannot afford such waste. There are, it is true, a few things that are not hurt by sowing early, plants that naturally reproduce themselves in Canada. In this category will be onions, garden peas, parsnips, lettuce, radish, etc., among the vegetables, and in the flowers—common bachelor's buttons, sweet peas, alyssum. All of these and some more will stand moderate frost and throughout most of Canada can be sown just as soon as the soil can be worked. But there are a great many more flowers and vegetables that will not survive frost. These must not be sown outside until the weather really turns warm. Actually they will not make any growth until the soil is warm, usually in mid-May or later. There is nothing to be gained by rushing them in too soon.

Wool Clip Required For War Purposes

It will soon be shearing time in Canada. As a large percentage of the 1941 Canadian wool clip will be used in war contracts it is important that Canadian wool be handled and marketed to best advantage, says A. MacMillan, Production Service, Dominion Department of Agriculture. All wool sold commercially will be graded according to the Canadian wool standards and in this way each grade will be used for the purpose for which it is best suited. As Canadian wool of itself is equal to any produced elsewhere.

Utmost care should be used to keep wool clean.

At each end. The small filaments act as cathodes which start an arc through the length of the tube, after which they are automatically self-off while the arc continues, according to this article.

So the next time you buy a light bulb or tube for a few cents, take a second look at it. That glass bulb contains many outstanding contributions of engineering—electrical, mechanical and chemical!

Local News Items

Tom Glendinning, member of the
Royal Bank Staff of Calgary, son of
Mr. and Mrs. T. Glendinning of Strath-
more has joined His Majesty's Army
as paymaster. He is at present sta-
tioned in Calgary.

Mr. Crowther will attend the Teach-
ers Convention being held in Edmon-
ton next week. He and Ronnie will
leave Sunday for the Northern city.

Mr. Eyles will also be in attendance
at the Convention.

Mrs. W. E. Julian and Billy expect
to move out of their farm home dur-
ing the Easter week.

Misses Alice and Jean Garrett will
spend the holiday week at their home
in Strathmore.

Don Nicholl will come from High
river to enjoy the week end with his
parents in Strathmore.

Miss Jean McGregor is leaving
Thursday night for Vancouver where
she will be the guest of Mr. and Mrs.
Hector McGregor for the Easter
holiday.

Mrs. Gladys Morgan and Mr. Hugh
Grey entertained at a very enjoyable
dinner bridge of four tables, during
the week end. A happy social hour
and some interesting games were en-

joyed. Prize winners were, high Mrs.
T. E. Wright and Mr. Griffin, consul-
ation T. E. Wright and Mr. Moore.

Mr. and Mrs. W. E. Mercer invited
the former members of the Musical
Club to a social evening at their home
Friday last, in honor of Mr. and Mrs.
Fenwick.

Music and interesting conversa-
tion sped the evening quickly.
Dainty refreshments were served
by the hostess assisted by Miss Gor-
don, who remained over the weekend
with Mrs. Mercer.

Mr. and Mrs. Schulte and Mr. and
Mrs. Quirin returned to Minnewanka
recently, to see the change being
made in connection with the Power
project. They report a very inter-
esting day.

Mr. Griffin, Consulting Engineer of
the Minnewanka Dam is spending a
couple of days at Banff and Minne-
wanka this week.

Strathmore friends will be pleased
to hear that Mr. Ray Melvin has had
another promotion and has been trans-
ferred to Edmonton, to which city he
and his wife will move in the near
future.

Mr. and Mrs. D. A. Perry will spend
Easter Sunday in Medicine Hat, with
Mr. and Mrs. A. D. May. Mrs. May
will later spend some time with her
sister, Mrs. Perry.

Mrs. Williams, of Calgary, is vis-
iting her daughter, Mrs. Rowe, for
some time.

A combined service for the United
Church School and congregation will
be held Easter Sunday morning at
11 o'clock.

Mr. John Hickey was in town for a
short time during the week end, re-
turning to Brandon Sunday morning.

Mr. McMurray and Anson Chase
left Tuesday en route to the coast,
during which they will exhibit some
interesting displays recently set up.

Before the last war there were
more Germans earning a living in
London, England, than in all the col-
onies owned by Germany in those
days.

Experience is one teacher that al-
ways gets paid if not obeyed.

It is the man who has done nothing
who is sure nothing can be done.

HAVE YOU BOUGHT YOUR WAR
SAVING CERTIFICATES?

(Continued from Page One)

farmers, and to all those who depend

directly and indirectly upon the wheat

industry. It seems to me, however,

that there is one thing which can be

done, and that is for Governments to

remove the high tariffs and other

restrictions against international

trade and against the importation of

foreign goods; for these restrictions

have unquestionably been the main

reason for the reduced demand for

wheat, so far the piling up of un-

surpluses, hence for the lower prices.

If after this War international trade

is freed from restrictions, then for-

ward demand for wheat, I feel con-

fident, would soon greatly increase.

SEEDTIME AND HARVEST

By Dr. K. W. Neaby

Director, Agricultural Department

North-West Lands Elevator Association

Copping Method

Four weeks ago we asked the ques-

tion: "Will prairie soils wear out?"

We answered, "Yes, unless present

methods of crop production are

altered."

Since the announcement of the

Domestic Government Wheat Policy

for 1941, it is apparent that our crop-

ping methods will be altered. I have

been suggested on several occasions that

the war, and the embarrassing wheat

shortage, for which the war is

largely responsible, might well force

us to adopt better farming practices.

By that I mean practices which will

be better for the land, and which will

largely be used for increased summer-

fallowing.

Extensive increases in summer-

fallowing will inevitably aggravate the

soil drifting and water erosion

problems unless extreme care is

taken in tillage operations. Now, as

never before, the information avail-
able to farmers is that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is

being worn out, and that the soil is
